

Don't throw your future away.

Keep New Zealand Green.

Living allowance for learning

Students are the only group in NZ who have to borrow to eat. We need a universal living allowance for all students.

Challenge racism and homophobia

Too many of our politicians spout hateful and demeaning rhetoric. We stand proud for a diverse, tolerant society.

Decent wage for all

Current minimum wages are not enough to live on. We should scrap youth rates and raise the minimum wage to \$12 an hour.

Drug laws that make sense

Drug abuse is a health issue, not a criminal justice one, and no-one should be criminalised for personal cannabis use.

No blood for oil

We support an independent foreign policy placing peacekeeping above warmongering.

Proudly nuclear-free and GE-free

Being nuclear-free and GE-free should remain corner-stones of our national identity in the 21st Century.

Confront climate change

We need to stay in Kyoto, use our cars less, and develop green technologies to future-proof our country.

Better public transport

Gridlock wastes time, money and our environment. We need convenient affordable public transport.
